Our centers of activity

The sky within your reach...

become an
air traffic controller (M/F)

Belgocontrol is an autonomous public company, created in 1998, with the mission to guarantee the safety of air navigation in the airspace for which Belgium is responsible. Its zone of activities extends from ground level at the airports to 8,000 metres above Belgium and from 4,500 to 8,000 metres above the Grand Duchy of Luxembourg.

Besides the control of the air traffic, we offer aeronautical information and meteorological services, communication, navigation and radar surveillance, and training of air traffic controllers. More than 900 people, of whom 400 are air traffic controllers, are active at 9 sites, day and night, 365 days a year.

To strengthen its strategic position within the quickly changing European skies with accelerated air traffic growth, Belgocontrol is looking for dynamic responsible people eager to join its ranks as **air traffic controller (M/F)** at the Control tower of the Brussels National Airport, at one of the ATC Units of CANAC (Computer Assisted National Air Traffic Control Center) in Steenokkerzeel, or at the regional Tower and Approach Units of Antwerp, Ostend, Liège or Charleroi Airports.

The job

Fascinating world of aviation

The Air Traffic Controller is the indispensable cornerstone in the fascinating world of aviation to guarantee safe and orderly aviation services.

Challenging environment

Using the latest display and communication technology, the professional Air Traffic Controller lives in an active and challenging environment where responsibility and professionalism are essential priorities.

Job satisfaction

Air Traffic Controllers enjoy a high level of job satisfaction and benefit from an extremely flexible work schedule. Moreover, employees of Belgocontrol receive at the time of their permanent appointment very attractive salaries with an outstanding social benefits scheme.

More possibilities ...

You can pursue your career by following specific courses that will direct you to managerial functions in the ATS Operations and ATS Strategy and Planning Departments, or to a career as an instructor in the Training center or as a representative of the company in international fora.

Training

To become an Air Traffic Controller you need dedication and professionalism. We will help you to achieve the required high standards through an inhouse training scheme.

The overall training of air traffic controllers comprises two stages:

Basic training (ab initio) and radar training (qualification training) to become a tower air traffic controller (ADR), an approach air traffic controller (APS) or an en route air traffic controller (ACS). Every phase consists of a theoretical, a practical and an on-the-job training and is subject to permanent evaluation.

The training courses, conducted in English, will take 2 to 3 years. You will receive a salary from Day 1 of your training, but final job security will only be granted to those who successfully complete the full training.

The courses are principally given in the Training center of Belgocontrol in Steenokkerzeel. Dedicated instructors make use of state-of-the-art training technology with tower and radar simulators of the latest generation.

Belgocontrol also offers accommodation facilities, including 26 student rooms, a company restaurant and sports facilities.
